# Executive Summary

---

## SURVEY PURPOSE AND METHODS

The City of Castle Pines contracted with National Research Center, Inc. (NRC) to conduct its first community-wide resident survey. This type of survey addresses the key services that local governments provide to create a quality community.

In April and May of 2012, the Castle Pines Citizen Survey was conducted online, though residents who preferred a printed copy could request one. Approximately 3,148 households on the City's community mailing list were mailed an invitation, and email invitations and reminders were sent by the City to everyone who opted in to the City's email distribution list (over 2,700 email addresses). Additionally, the City's Master Homeowner's Association sent an email reminder to residents to complete the Web survey. The City also publicized the survey in its *News and Notes* e-newsletter.

The survey instructions encouraged all adult residents 18 or older to complete the survey, though the list sources for the invitations generally included homeowners only. With 1,406 completed surveys, the approximate response rate is 20-23%.

## SUMMARY OF SURVEY FINDINGS

### Quality of Life

❖ **Respondents to the 2012 Castle Pines Citizen Survey rated most aspects of quality of life and neighborhoods highly.**

- More than 9 out of every 10 Castle Pines survey respondents rated Castle Pines as a place to live, Castle Pines as a place to raise children, their neighborhood as a place to live and the overall quality of life in the city as either "excellent" or "good."
- Many respondents did not have an opinion of Castle Pines as a place to work (42%). Of those that did have an opinion, only 4 in 10 thought Castle Pines was an "excellent" or "good" place to work.

### Community Characteristics

❖ **More than half of respondents rated 11 of 15 community characteristics positively. Most of these were higher than ratings in communities across the nation and in the Front Range.**

- Over 80% of respondents rated the following six characteristics of Castle Pines as either "excellent" or "good."
  - The overall natural environment in Castle Pines
  - The overall image/reputation of Castle Pines
  - The availability of paths and walking trails
  - The overall appearance of Castle Pines
  - The availability of open space
  - The ease of walking in Castle Pines
- When asked what they liked most about Castle Pines, the most popular response was Castle Pines' location. Safety and the overall image/reputation of Castle Pines rounded out the top three responses. Very few respondents indicated cost of living as what they liked most about living in Castle Pines.

## Participation in Community Activities

- ❖ **Castle Pines respondents reported participating in community activities much more frequently than residents in other communities across the nation, on average.**
  - At least 9 out of 10 respondents had read the City's newsletter, visited a neighborhood park or visited the City's Web site in the last year.

## Shopping in Castle Pines

- ❖ **Shopping locally in Castle Pines as opposed to other areas was either "essential" or "very important" for most survey respondents and all respondents had made purchases in Castle Pines in the last six months. Furthermore, more than half of respondents would like to see more breakfast/cafes and hardware stores in Castle Pines.**
  - Over two-thirds of respondents had purchased groceries or personal items in Castle Pines either "frequently" or "always" in the last six months.
  - Respondents most commonly shopped in Castle Pines when compared to the surrounding communities or areas in the last 6 months. Lone Tree was the second most common destination followed by Highlands Ranch, Founders/Factory outlets, another city or town, Downtown Castle Rock and Parker.

## City Services

- ❖ **City Services in Castle Pines generally were rated positively by survey respondents. In addition, most services were rated above those in other communities across the nation.**
  - Over 80% of respondents rated Fire District/EMT services, drinking water, parks, open space, the local library, Sheriff's services (response to calls) and street signage as "excellent" or "good."
  - Of the 15 services that could be compared to national benchmark data, seven city services were rated above the national benchmark, three were similar and five were below.
  - Of the 13 services that could be compared to other Front Range communities, drinking water and traffic signal timing were rated higher, eight services were rated lower than the Front Range benchmark and three were rated similar.

## City Employees

- ❖ **Respondent perceptions of City office employees generally were below both national and Front Range comparisons.**
  - Just over one-third of respondents reported having had contact with a City office employee in the 12 months prior to the survey.
  - While most employee characteristics received positive ratings from respondents who had contact, they were similar to or below the benchmark comparisons.

## Government Performance

- ❖ **Survey respondent evaluations of the overall direction the City is taking were much lower in comparison to other jurisdictions in the Front Range and across the nation.**
  - Half of respondents (49%) thought the overall direction the City was taking was "excellent" or "good." The remaining 51% thought the overall direction was either "fair" or "poor."

- The top four government performance areas received “excellent” or “good” ratings from at least half of respondents: parks and recreation (74% “excellent” or “good”), communicating with residents (65%), the quality of services provided by the City’s street repair contractors (55%) and opportunities to participate in City government decisions (52%).
- Six of 11 aspects of government performance could be compared to other communities across the nation; communicating with residents was rated above the benchmark. The other five aspects were below the national benchmarks. Similarly, the three aspects that could be compared to other Front Range communities were all rated lower in Castle Pines.

## Sources of Information about Castle Pines

❖ **The *Castle Pines Connection* newspaper was the most commonly used source for information on Castle Pines for survey respondents. Other popular sources of information about Castle Pines were word of mouth and the City’s quarterly newsletter (*The Castle Pines Citizen*).**

- The following seven sources were never used by a majority of survey respondents:
  - Castle Pines Chamber of Commerce emails
  - City Council meeting minutes online
  - Social networking sites (i.e., Facebook, MySpace, Twitter, etc.)
  - Castle Pines Chamber of Commerce Web site ([www.castlepineschamber.com](http://www.castlepineschamber.com))
  - City Council meetings (in-person)
  - Master Association Board meetings
  - Metro District Board meetings

## Community Activities and Events

❖ **Opportunities to attend cultural activities was rated relatively poorly by Castle Pines respondents. When provided the opportunity to indicate their support for or opposition to a variety of cultural activities, respondents mostly were supportive.**

- A majority of respondents supported five of the six Castle Pines Arts Commission’s proposed activities and events. The acquisition of public sculptures by the Arts Commission showed comparable levels of support and opposition (51% support vs. 49% oppose).
- Of the eight classes and lectures asked about on the survey, only one (lectures by culinary artists) generated interest from a majority of respondents.

## Castle Pines Recreation Facilities

❖ **Recreational opportunities in Castle Pines received less favorable evaluations from respondents than other services provided in the city. In response to a lack of recreational opportunities, most respondents supported a recreation center in Castle Pines as well as most of the other recreation facilities listed in the survey.**

- A majority of respondents supported ten of the 11 proposed recreational facilities, a skate park was the exception.
- Over three-quarters of respondents supported a recreation center in Castle Pines. A similar percentage said they would use an exercise room or a swimming pool at least once a month at this facility.
- When asked how the City should fund a recreation center, a clear majority of respondents were in support of user fees or some combination of user fees. Respondents were nearly split over the use of a sales tax increase (55% support) and over two-thirds (69%) opposed a property tax increase.

## Challenges and Priorities

- ❖ **Respondents commonly indicated that securing reliable, long-term renewable water was a vital challenge for the community as well as a top priority for the Metro District.**
  - Additional challenges that respondents saw facing Castle Pines included road and street maintenance and the management of growth and development. Over 80% of respondents indicated that it was “essential” or “very important” for Castle Pines to address these priorities.
  - Reducing water, wastewater and storm water utility costs was the only Metro District priority, other than securing reliable, long-term renewable water, that a majority of respondents indicated was most vital.

## IN SUMMARY

As one of Colorado’s newest communities, overall ratings in Castle Pines’ first citizen survey were generally positive. Overall quality of life, the image and reputation of Castle Pines and the city as a place to live and raise children all were rated favorably. However, survey results revealed several areas in which respondents were not fully satisfied. For example, several areas of government performance received relatively low ratings when compared to other aspects measured on the survey and were rated below both national and Front Range benchmarks. Only Castle Pines’ performance in communicating with residents rose to a level that was above the national benchmark. Furthermore, respondents rated recreational and cultural opportunities lower than other communities in the nation. A majority of respondents supported the creation of a Castle Pines recreation center as well as several other recreational facilities. Residents were satisfied with the overall quality of City services. Comparisons to other jurisdictions showed that there were several areas where there may be opportunity for the City to strengthen resident appreciation of local services and community quality.

## Survey Background

---

### SURVEY PURPOSE

The City of Castle Pines contracted with National Research Center, Inc. (NRC) to conduct its first community-wide resident survey. The Castle Pines Citizen Survey serves as a consumer report card for Castle Pines by providing residents the opportunity to rate the quality of life in the city, as well as the community's amenities, service delivery and their satisfaction with local government. The survey also gives residents a chance to provide feedback to City leaders on what is working well and what is not, and to communicate their priorities for community planning and resource allocation.

The focus on the quality of service delivery and the importance of services helps council, staff and the public to set priorities for budget decisions and lays the groundwork for tracking community opinions about the core responsibilities of Castle Pines city government, helping to assure maximum service quality over time.

This type of survey addresses the key services that local governments provide to create a quality community. It is akin to private sector customer surveys that are used regularly by many corporations to monitor where there are weaknesses in product or service delivery before customers defect to competition or before other problems from dissatisfied customers arise.

### METHODS

The 2012 Castle Pines Citizen Survey was conducted online, though residents who preferred a printed copy could request one. An invitation letter was mailed by the City of Castle Pines to just over 3,100 households at the beginning of April 2012. About one week later, an email invitation was sent by the City to everyone who opted in to the City's email distribution list (over 2,700 email addresses). A reminder email was sent to the same list of subscribers at the end of April. The City's Master Homeowner's Association also sent out an email message to its members at the end of April reminding residents to complete the Web survey. Additionally, the City publicized the survey in its *News and Notes* e-newsletter mid-April. Data collection ended the first week in May.

The survey instructions encouraged all adult residents 18 or older to complete the survey. Exceptionally few renters completed the survey (approximately 1%), and though renters are less likely than owners to respond to surveys, this very small rate of participation suggests that renters generally were not represented by the email and physical mailing lists. Because the sample was nearly entirely homeowners, the results are not generalizable to renters in Castle Pines.

The nature of the sampling and response patterns precludes the calculation of a precise response rate, though one can be approximated. Given that 1,406 respondents completed surveys (four of which were completed via a printed survey), that there are 6,876 adults age 18 years and 86% of housing units are owned (both according to the 2010 Census), the response rate is 20-23%.

It is customary to describe the precision of estimates made from surveys by a "level of confidence" and accompanying "confidence interval" (or margin of error). The 95 percent confidence interval for this survey is generally no greater than plus or minus three percentage points around any given percent reported for the entire primarily homeowner sample (1,406 completed surveys).

See *Appendix E: Detailed Survey Methodology* for more detail about the survey methodology.

## HOW THE RESULTS ARE REPORTED

For the most part, the “percent positive” and the percent of respondents giving each possible response to a particular question are presented in the body of the report. The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good”).

On many of the questions in the survey, respondents could give an answer of “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in *Appendix A: Complete Set of Survey Frequencies* and is discussed in the body of this report if it is 20% or greater. However, these responses have been removed from the analyses presented in the body of the report, unless otherwise indicated. In other words, the majority of the tables and graphs in the body of the report display the responses from those who had an opinion about a specific item.

For some questions, respondents were permitted to select or write in multiple responses. When the total exceeds 100% in a table or figure for a multiple response question, it is because some respondents are counted in multiple categories. When a table or figure for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

## Comparing Survey Results by Geographic and Demographic Subgroups

Most of the survey results were compared by geographic area of residence (Ward) while select survey results were compared by demographic characteristics of survey respondents. These breakdowns are discussed throughout the body of the report (a full set of these results can be found in *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence* and *Appendix C: Comparison of Select Questions by Respondent Characteristics*). Where estimates are given for subgroups, they are less precise. Generally the 95% confidence interval ranges from plus or minus five percentage points for samples of about 400 to plus or minus 10 percentage points for samples as small as 100. For smaller sample sizes (i.e., 50), the margin of error rises to 14%.

## Comparing Survey Results to Other Jurisdictions

Taking the pulse of the community has less meaning without knowing what pulse rate is too high and what is too low. When surveys of service satisfaction turn up “good” citizen evaluations, it is necessary to know how others rate their services to understand if “good” is good enough or if most other communities are “excellent.” Furthermore, in the absence of national or peer community comparisons, a jurisdiction is left with comparing its fire protection rating to its street maintenance rating. That comparison is unfair as street maintenance always gets lower ratings than fire protection. More illuminating is how residents’ ratings of fire service compare to opinions about fire service in other communities and to resident ratings over time.

A police department that provides the fastest and most efficient service – one that closes most of its cases, solves most of its crimes, and keeps the crime rate low – still has a problem to fix if the residents in the city rate police services lower than ratings given by residents in other cities with objectively “worse” departments. Benchmark data can help that police department – or any City department – to understand how well citizens think it is doing.

NRC’s database of comparative resident opinion is comprised of resident perspectives gathered in citizen surveys from over 500 jurisdictions whose residents evaluated local government services. Conducted with typically no fewer than 400 residents in each jurisdiction, opinions are intended to represent over 30 million Americans. NRC has innovated a method for quantitatively integrating the results of surveys that we have conducted with those that others have conducted. These integration methods have been described thoroughly in *Public Administration Review*, *Journal of Policy Analysis*

and Management, and in NRC's first book on conducting and using citizen surveys, *Citizen Surveys: how to do them, how to use them, what they mean*, published by the International City/County Management Association (ICMA). Scholars who specialize in the analysis of citizen surveys regularly have relied on NRC's work [e.g., Kelly, J. & Swindell, D. (2002). Service quality variation across urban space: First steps towards a model of citizen satisfaction, *Journal of Urban Affairs*, 24, 271-288.; Van Ryzin, G., Muzzio, D., Immerwahr, S., Gulick, L. & Martinez, E. (2004). Drivers and consequences of citizen satisfaction: An application of the American Customer Satisfaction Index Model to New York City, *Public Administration Review*, 64, 331-341]. The method described in those publications is refined regularly and statistically tested on a growing number of citizen surveys in NRC's proprietary databases.

Jurisdictions in NRC's benchmark database are distributed geographically across the country and range from small to large in population size. Comparisons may be made to all jurisdictions in the database or to a subset of jurisdictions, like Colorado's Front Range jurisdictions, as in this report. Despite the differences in jurisdiction characteristics, all are in the business of providing local government services to residents. Though individual jurisdiction circumstances, resources and practices vary, the objective in every community is to provide services that are so timely, tailored and effective that residents conclude the services are of the highest quality. High ratings in any jurisdiction, like SAT scores in any teen household, bring pride, and a sense of accomplishment.

While benchmarks help set the basis for evaluation, citizen opinion should be used in conjunction with other sources of data about budget, population demographics, personnel and politics to help managers know how to respond to comparative results.

### **Comparison of Castle Pines to the Benchmarking Database**

Jurisdictions use the comparative information provided by benchmarks to help interpret their own citizen survey results, to create or revise community plans, to evaluate the success of policy or budget decisions and to measure local government performance. National and Front Range benchmark comparisons have been included in the report when available. Jurisdictions to which Castle Pines was compared can be found in *Appendix F: Jurisdictions Included in Benchmark Comparisons*. Benchmark comparisons have been provided when similar questions on the Castle Pines survey are included in NRC's database and there are at least five jurisdictions in which the question was asked, though most questions are compared to more than five other jurisdictions across the country.

Where comparisons for quality ratings were available, the City of Castle Pines' results were generally noted as being "above" the benchmark, "below" the benchmark or "similar" to the benchmark. For some questions – those related to resident behavior, circumstance or to a local problem – the comparison to the benchmark is designated as "more," "similar" or "less" (for example, residents contacting the City in the last 12 months). In instances where ratings are considerably higher or lower than the benchmark, these ratings have been further demarcated by the attribute of "much," (for example, "much less" or "much above"). These labels come from a statistical comparison of Castle Pines' rating to the benchmark where a rating is considered "similar" if it is within the margin of error; "above," "below," "more," or "less" if the difference between Castle Pines' rating and the benchmark is greater the margin of error; and "much above," "much below," "much more" or "much less" if the difference between Castle Pines' rating and the benchmark is more than twice the margin of error.

# Survey Results

## QUALITY OF LIFE IN CASTLE PINES

The 2012 Castle Pines Citizen Survey measured resident opinions about a variety of aspects of the community including the quality of life in the city. According to survey respondents, Castle Pines is a great place to live and retire. Almost all respondents (95% said “excellent” or “good”) had a positive opinion of the overall quality of life in Castle Pines. Most survey respondents also indicated that Castle Pines was an “excellent” or “good” place to live, raise children and retire. The city as a place to work received the lowest evaluation for aspects of quality of life with only 42% of respondents giving an “excellent” or “good” rating.

While most respondents had opinions about the other aspects of the quality of life in Castle Pines, many respondents had no opinion of Castle Pines as a place to work (42% indicated “don’t know” to this item, see *Appendix A: Complete Set of Survey Frequencies* page 36).

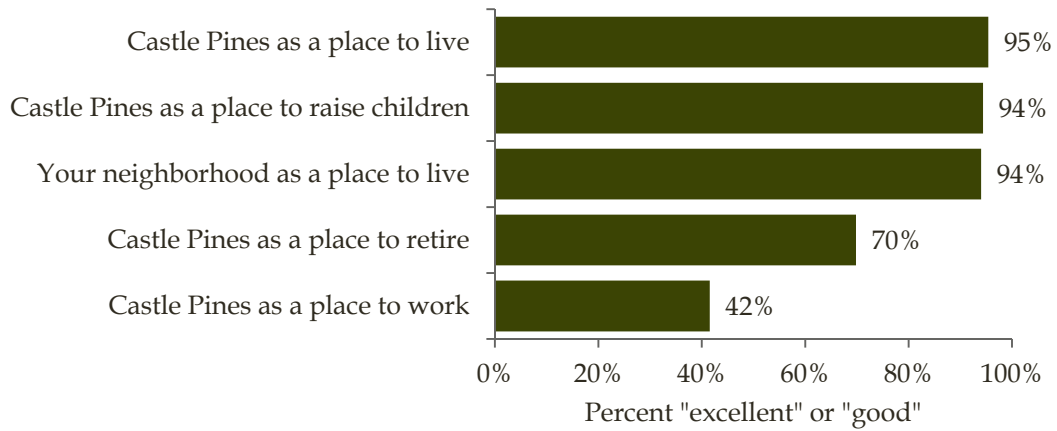

All of the aspects of quality of life were rated much above both national and Front Range benchmarks, except Castle Pines as a place to work, which was much below both sets of comparisons (see Figure 3 on the following page).

While respondents from all three Wards generally rated the quality Castle Pines similarly in terms of as a place to live, raise children, work and overall, respondents from Ward 2 tended to rate Castle Pines more positively as a place to retire (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*). Respondents without children rated Castle Pines as a place to retire more positively than respondents with children. Those who had lived in Castle Pines for five years or less were more likely to give higher ratings than those who lived in the city for a longer period of time to Castle Pines as a place to live, their neighborhood as a place to live and the overall quality of life in Castle Pines (see *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

**Figure 1: Overall Quality of Life**

**Figure 2: Aspects of Quality of Life**

**Figure 3: Quality of Life Benchmarks**

Please rate each of the following aspects of quality of life in Castle Pines:	National comparison	Front Range comparison
Castle Pines as a place to live	Much above	Much above
Castle Pines as a place to raise children	Much above	Much above
Your neighborhood as a place to live	Much above	Much above
Castle Pines as a place to retire	Much above	Much above
Castle Pines as a place to work	Much below	Much below
The overall quality of life in Castle Pines	Much above	Much above

## COMMUNITY CHARACTERISTICS

Survey respondents were asked to assess various characteristics of the community as they related to Castle Pines as a whole (see Figure 4 on the following page). Over half of respondents indicated that 11 of the 15 characteristics listed were either “excellent” or “good” and over 80% of respondents rated the following six characteristics as either “excellent” or “good:”

- The overall natural environment in Castle Pines
- The overall image/reputation of Castle Pines
- The availability of paths and walking trails
- The overall appearance of Castle Pines
- The availability of open space
- The ease of walking in Castle Pines

Opportunities to attend cultural events and opportunities for older adult activities were rated as “excellent” or “good” by less than 20% of respondents (see *Appendix A: Complete Set of Survey Frequencies* on page 36 for a full set of responses).

Opportunities for older adult activities was one of three characteristics with a high proportion of “don’t know” responses. Opportunities to volunteer and handicap access on sidewalks and crosswalks also saw high proportions of “don’t know” responses (see *Appendix A: Complete Set of Survey Frequencies* on page 36 for a full set of responses including “don’t know”).

Eleven of the 15 characteristics included in the Castle Pines survey could be compared to national and Front Range benchmarks. Seven of Castle Pines’ community characteristics were either much above or above both the national and Front Range benchmarks. The four characteristics that were much below both sets of benchmark comparisons related to cultural activities, recreational and volunteer opportunities and the quality of business and service establishments (see Figure 5 on the following page).

Respondents from Ward 2 gave lower ratings to opportunities to attend family oriented-events/activities, ease of walking and biking, availability of paths and walking trails and the overall image/reputation of Castle Pines than those in other Wards (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*). Respondents with no children under age 18 and households with adults age 55 or older gave higher rating to the overall quality of business and service establishments and recreational opportunities in Castle Pines than those with children under age 18 and without older adults (age 55 or older). Respondents who had lived in Castle Pines for five years or less rated the sense of community and overall appearance of Castle Pines higher than those respondents who had lived in Castle Pines longer (see *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

**Figure 4: Community Characteristics of Castle Pines**

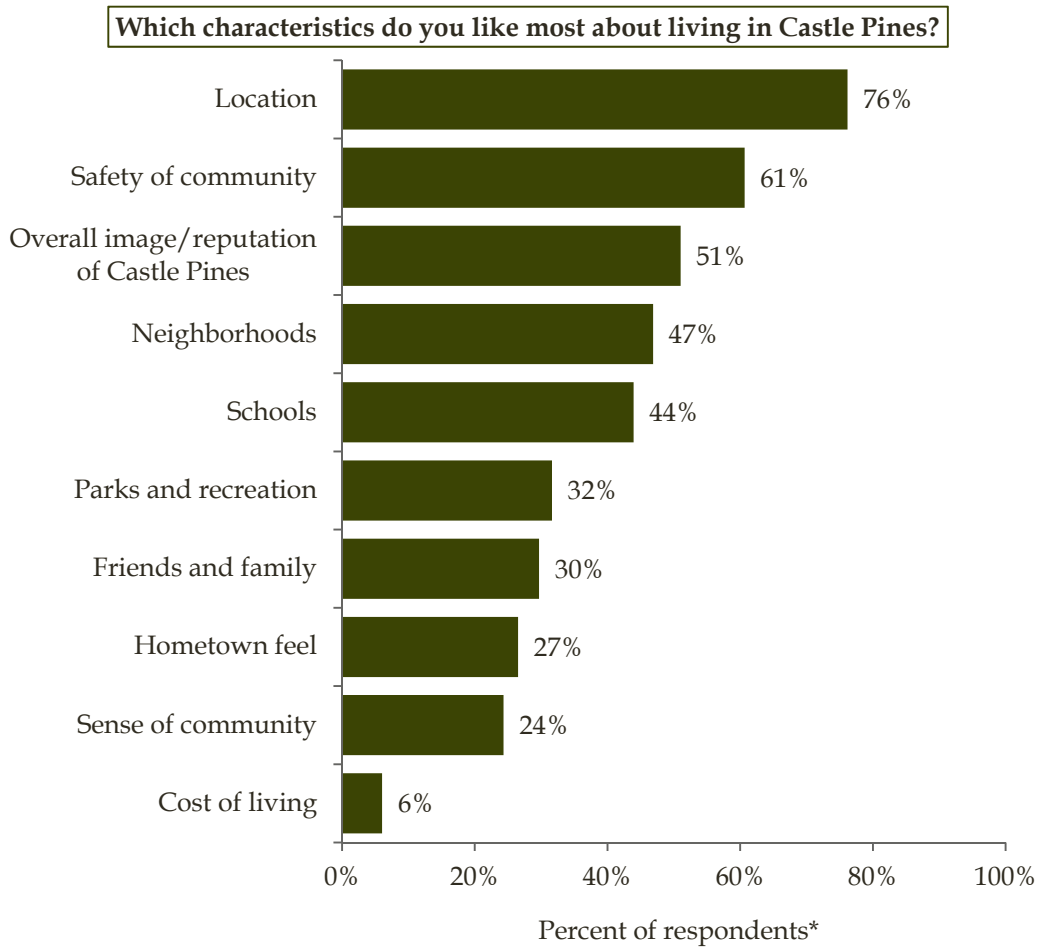

**Figure 5: Community Characteristics Benchmarks**

Please rate the following characteristics as they relate to Castle Pines as a whole.	National comparison	Front Range comparison
Quality of overall natural environment in Castle Pines	Much above	Much above
Overall image/reputation of Castle Pines	Much above	Much above
Availability of paths and walking trails	Much above	Much above
Overall appearance of Castle Pines	Much above	Much above
Ease of walking in Castle Pines	Much above	Much above
Ease of bicycle travel in Castle Pines	Much above	Much above
Sense of community	Above	Much above
Overall quality of business and service establishments in Castle Pines	Much below	Much below
Recreational opportunities	Much below	Much below
Opportunities to volunteer	Much below	Much below
Opportunities to attend cultural activities	Much below	Much below

Respondents were asked to select which characteristics they liked most about living in Castle Pines. They could identify more than one characteristic. Castle Pines’ location was the most commonly selected trait (76% of respondents). Safety and the overall image/reputation of Castle Pines were chosen by over half of respondents (61% and 51% respectively). Least commonly identified as most-liked attributes of the City were parks and recreation (32%), friends and family (30%), hometown feel (27%), sense of community (24%) and cost of living (6%).

Although differences were not statistically significant, when looking at responses to this question by Ward, respondents from Ward 2 were less likely to select “schools” and “hometown feel” as what they liked most about living in the city than were respondents from Wards 1 and 3. Respondents from all three Wards tended to select the other characteristics of Castle Pines in a comparable manner (see Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence).

**Figure 6: Characteristics Respondents Liked Most about Castle Pines**

\*Total exceeds 100% as respondents could select multiple responses.

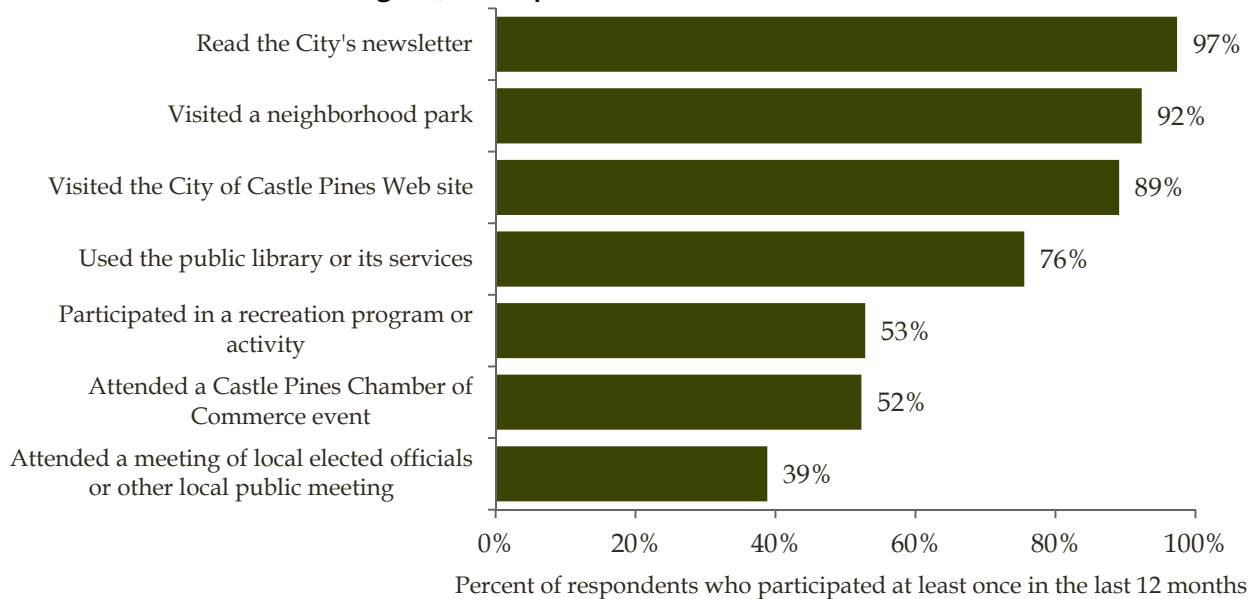

## PARTICIPATION IN COMMUNITY ACTIVITIES

The survey included a variety of civic and information activities and asked respondents about their participation. In the year prior to completing the survey, a majority of respondents reported having done all but one of the community activities listed on the survey. Nearly all respondents had read the City’s newsletter (97% said they had done this at least one time in the previous 12 months), visited a neighborhood park (92%), visited the City’s Web site (89%) or used the public library or its services (76%). Roughly half had participated in a recreation program or activity or attended a Castle Pines Chamber of Commerce event and 39% had attended a local elected officials or other public meeting.

All activities but attending a Chamber of Commerce event could be compared to national and Front Range benchmarks. At the national level, respondents from Castle Pines participated in all of these activities much more often than residents in other communities across the country. Results were mixed, however, when compared to other Front Range communities. Respondents from Castle Pines were much more likely to have read their City’s newsletter, visited their City’s Web site and attended a local meeting than their Front Range peers. Respondents were as likely to have visited a neighborhood park or have used the public library, and much less likely to have participated in a recreation program or activity when compared to other Front Range communities.

Respondents in Ward 2 were less likely to have participated in a recreation program or activity, visited a neighborhood park or attended a Castle Pines Chamber of Commerce event in the last year than those in Wards 1 and 3. Residents in all Wards, however, were equally as likely to have read the City’s newsletter in the last year (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 7: Participation in Castle Pines Activities**

**Figure 8: Participation in Community Activities Benchmarks**

<b>In the last 12 months, about how many times, if ever, have you or other household members participated in the following activities in Castle Pines?</b>	<b>National comparison</b>	<b>Front Range comparison</b>
Read the City’s newsletter	Much more	Much more
Visited a neighborhood park	Much more	Similar
Visited the City of Castle Pines Web site (at www.castlepinesgov.com)	Much more	Much more
Used the public library or its services	Much more	Similar
Participated in a recreation program or activity	Much more	Much less
Attended a meeting of local elected officials or other local public meeting	Much more	Much more

## SHOPPING IN CASTLE PINES

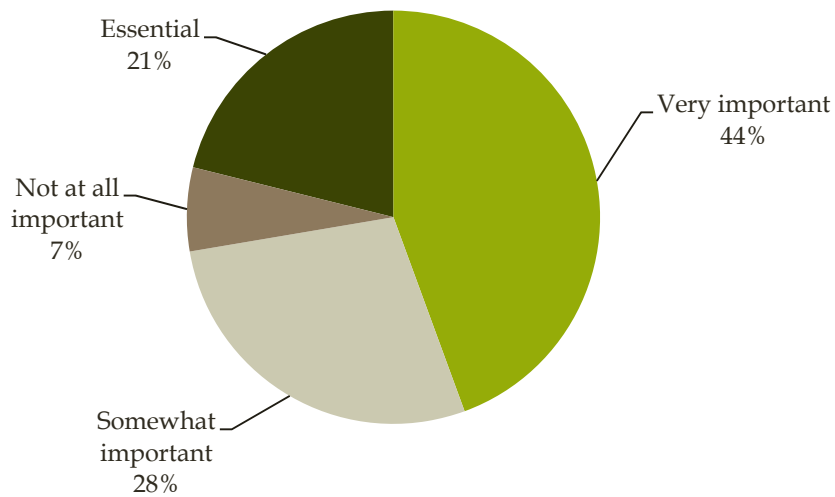

The availability of a variety of retail opportunities promotes economic vitality within a community. A number of questions on the 2012 survey assessed how Castle Pines residents viewed the importance of keeping their dollars in Castle Pines as well as the types of retail and shopping opportunities they would like to see available to them.

Approximately two-thirds of respondents considered shopping locally (in Castle Pines) to be either “essential” or “very important.” Less than 10% of respondents considered shopping locally to not be important at all.

Similar proportions of respondents indicated that shopping in Castle Pines was “essential” or “very important,” regardless of geographic location, gender, length of residency or whether or not there were children or older adults in the household (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence* and *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

**Figure 9: Importance of Shopping in Castle Pines**

Please rate how important, if at all, it is to you to shop in Castle Pines.

Groceries and personal items were the items most commonly purchased in Castle Pines. Nearly all respondents (95%) “always” or “frequently” purchased groceries in the city in the last six months and 72% said the same of personal items. Over half of respondents had “never” purchased pet services or medical services in Castle Pines in the last six months.

Respondents from Ward 3 were more likely to buy personal items, banking and insurance, personal services, automotive services and pet services in Castle Pines than were respondents from Wards 1 and 2 (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

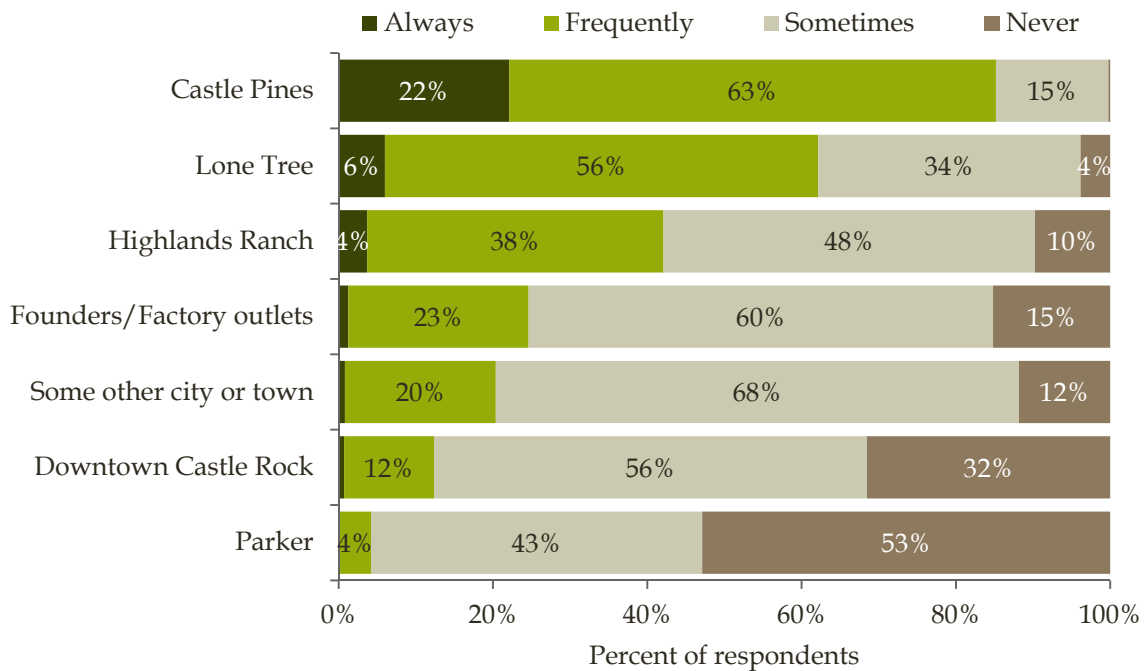

**Figure 10: Items and Services Purchased in Castle Pines in the Last 6 Months**

Survey respondents were asked to indicate how often they had made purchases of any kind in Castle Pines and other areas in the last six months. Respondents most commonly shopped in Castle Pines in the last six months. Lone Tree was the second most common destination for shopping among survey respondents followed by Highlands Ranch, Founders/Factory outlets, some other city or town, Downtown Castle Rock and Parker.

Respondents across all Wards were equally likely to have made purchases in Castle Rock, Lone Tree, Founders/Factory outlets, Parker or some other city or town. Respondents from Ward 1 were more likely to have made purchases in Highlands Ranch but less likely to have made purchases in downtown Castle Rock compared to those living in the other two Wards (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 11: Purchases Made in the City Versus in Surrounding Areas**

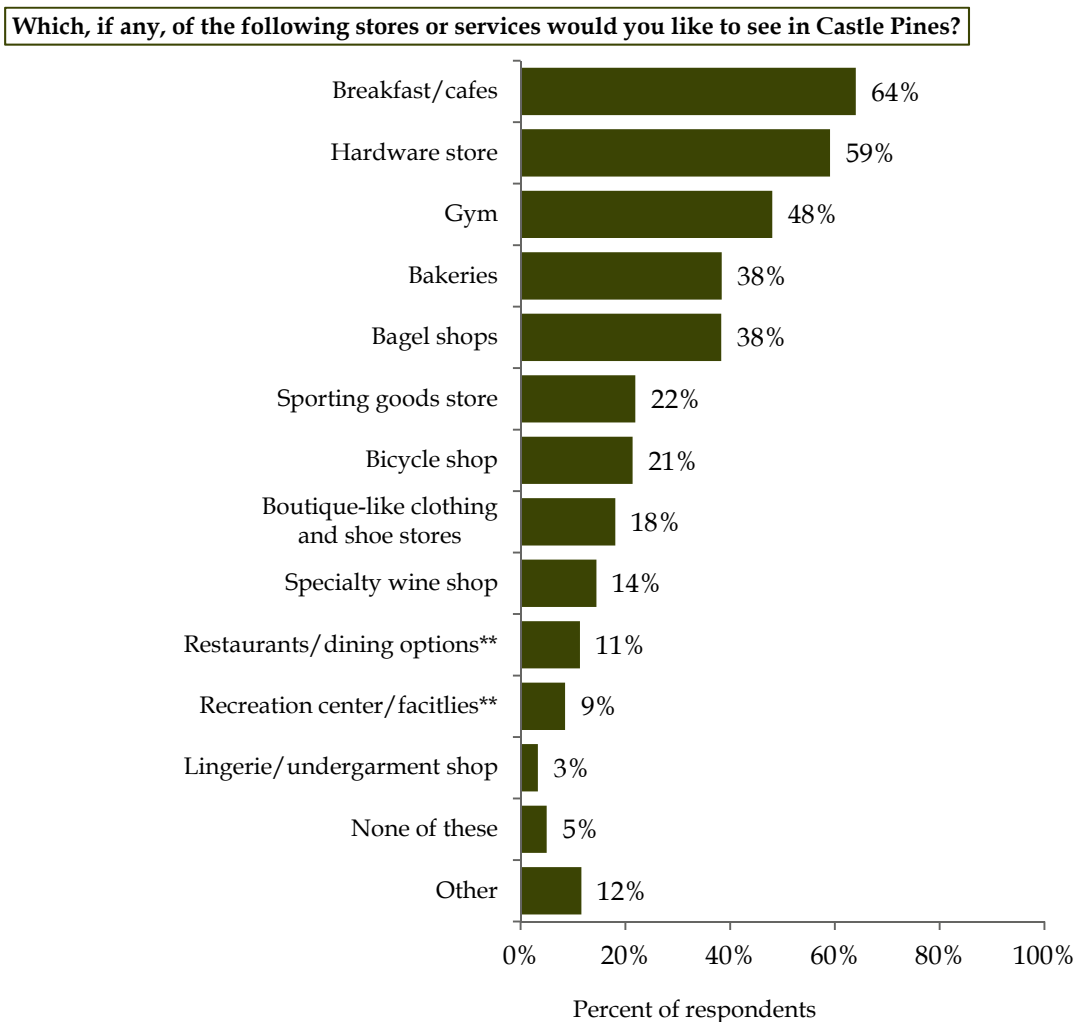

As Castle Pines considers possible future commercial development, City leaders would like to know where the community’s interests lay. When asked which stores and services they would like to see in Castle Pines, breakfast/cafés was the most popular response (64% of respondents) followed by hardware stores (59%) and a gym (48%). Less than 5% of respondents indicated that they would like to see a lingerie/undergarment shop in Castle Pines.

Respondents also were given the opportunity to write in a store or service that was not listed on the survey. The “other” responses were reviewed and two additional types of stores or services were created: restaurant or dining options (11% of respondents wrote in this type of service) and recreation center or facility (9%). These two services are represented as their own categories in Figure 12 below. Twelve percent of respondents listed some “other” store or service that could not be grouped into an existing or new store or service. For a complete list of these responses see *Appendix D: Verbatim Responses to Open-ended Questions*.

Crosstabulations by Ward for this question can be found in *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*. Respondents from the various Wards showed little difference in how often they selected each of the options.

**Figure 12: Stores and Services Desired in Castle Pines**

\* Categories do not total to 100%. Respondents could select more than one store or service.

\*\* These categories were drawn from “other, please specify” responses and were not listed on the survey instrument.

## CITY SERVICES

The survey asked respondents to evaluate a 20 individual services in Castle Pines as well as the overall quality of services. Approximately three-quarters of respondents indicated that the overall quality of services in Castle Pines was “excellent” or “good.” One-quarter felt the overall quality of services in the city was “fair” and 4% thought it was “poor.” These ratings were lower than the national benchmark and much lower than the Front Range benchmark.

The overall quality of services in Castle Pines was rated more positively by respondents with children age 17 or younger than those without children (see *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

**Figure 13: Overall Quality of Services in Castle Pines**

Respondents were asked to evaluate 20 different individual services in Castle Pines (see Figure 14 on the next page). The five most highly rated services included the fire district/EMT services (94% “excellent” or “good”), drinking water (86%), parks (85%), open space (83%) and the local library (83%).

Snow removal (50% “excellent” or “good”), building permits/inspections (48%) and land use planning and zoning (45%) received the lowest service ratings. Between 10% and 24% of respondents described the following services as “poor:” traffic enforcement, bike lanes, traffic signal timing, municipal court, reliable, long-term renewable water, animal control (i.e., domestic pets not wildlife), street maintenance or repair, snow removal, building permits/inspections and land use planning and zoning.

It is important to note that 10 of the 20 services listed received a high proportion of “don’t know” responses. Between 23% and 81% of respondents indicated “don’t know” to the following 10 items: municipal court, building permits/inspections, sheriff’s services (response to calls), animal control (i.e., domestic pets not wildlife), fire district/EMT services, land use planning and zoning, waste water, storm water, reliable, long-term renewable water and traffic enforcement. For a full list of “don’t know” responses see *Appendix A: Complete Set of Survey Frequencies*.

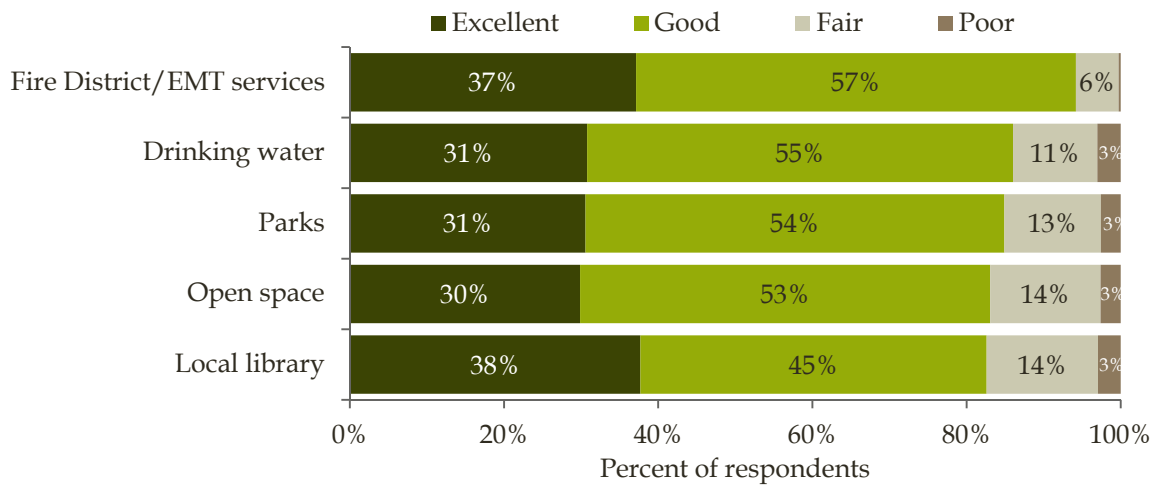

Fifteen of the 20 services included in the survey could be compared to national benchmark data. Castle Pines’ ratings were more commonly above the national benchmark (seven services were above or much above) than below (five services were below or much below). Three services were similar to the national benchmark.

Of the 13 services that could be compared to other Front Range communities, drinking water and traffic signal timing were above the Front Range benchmarks, eight services were rated lower than

the Front Range benchmark and three were rated similar (see Figure 15 on the following page).

While the majority of services were rated similarly across all Wards, several differences are worth noting. Ward 1 gave higher ratings to traffic signal timing, bike lanes, Sheriff’s services and traffic enforcement than those in the other Wards. Ward 3, on the other hand, gave the lowest ratings to snow removal, Sheriff’s services and traffic enforcement (see Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence).

**Figure 14: Top Rated Services**

**Figure 15: Quality of Services in Castle Pines**

Please rate the quality of each of the following services:	Excellent	Good	Fair	Poor	National comparison	Front Range comparison
Fire District/EMT services	37%	57%	6%	0%	Above	NA

## Key Driver Analysis

Knowing where to focus limited resources to improve services or communication, and therefore also residents' opinions of local government, requires information that targets the service areas that are most important to residents. In local government, core services – like fire protection or others directed at safety – invariably land at the top of the list created when residents are asked about the most important City services. While these are essential, and should remain the focus of continuous monitoring and improvement where necessary, they are unlikely to fully explain residents' opinions of the city.

In market research, identifying the most important characteristics of a transaction or product is called Key Driver Analysis (KDA). The key drivers that are identified from that analysis do not come from asking customers to self-report which service or product characteristic most influenced their decision to buy or return, but rather from statistical analyses of the predictors of their behavior. When customers are asked to name the most important characteristics of a good or service, responses often are expected or misleading – just as they can be in the context of a citizen survey. For example, air travelers often claim that safety is the primary consideration in their choice of an airline, yet key driver analysis reveals that frequent flier perks or in-flight entertainment predicts their buying decisions.

By using KDA, NRC's approach digs deeper to identify the less obvious, but more influential services that are most related to residents' ratings of overall quality of local government services.

A KDA was conducted for the City of Castle Pines by examining the relationships between ratings of each service and ratings of the City of Castle Pines' overall services. Those key driver services that correlated most highly with residents' perceptions about overall City service quality have been identified. By targeting improvements in key services, the City of Castle Pines can focus on the services that have the greatest likelihood of influencing residents' opinions about overall service quality.

The 2012 City of Castle Pines Action Chart™ on the following page combines two dimensions of performance:

- Comparison to the national benchmark. When a comparison is available, the background color of each service box indicates whether the service is above the norm (green), similar to the norm (yellow) or below the norm (red).
- Identification of key drivers. A black key icon (🔑) next to a service box notes a key driver.

Since this is the first general resident survey for Castle Pines, comparisons to previous survey results were not available. Results from future Castle Pines survey administrations will permit the addition of a third dimension of performance to be included in the Action Chart – arrows indicating whether results are trending up or down.

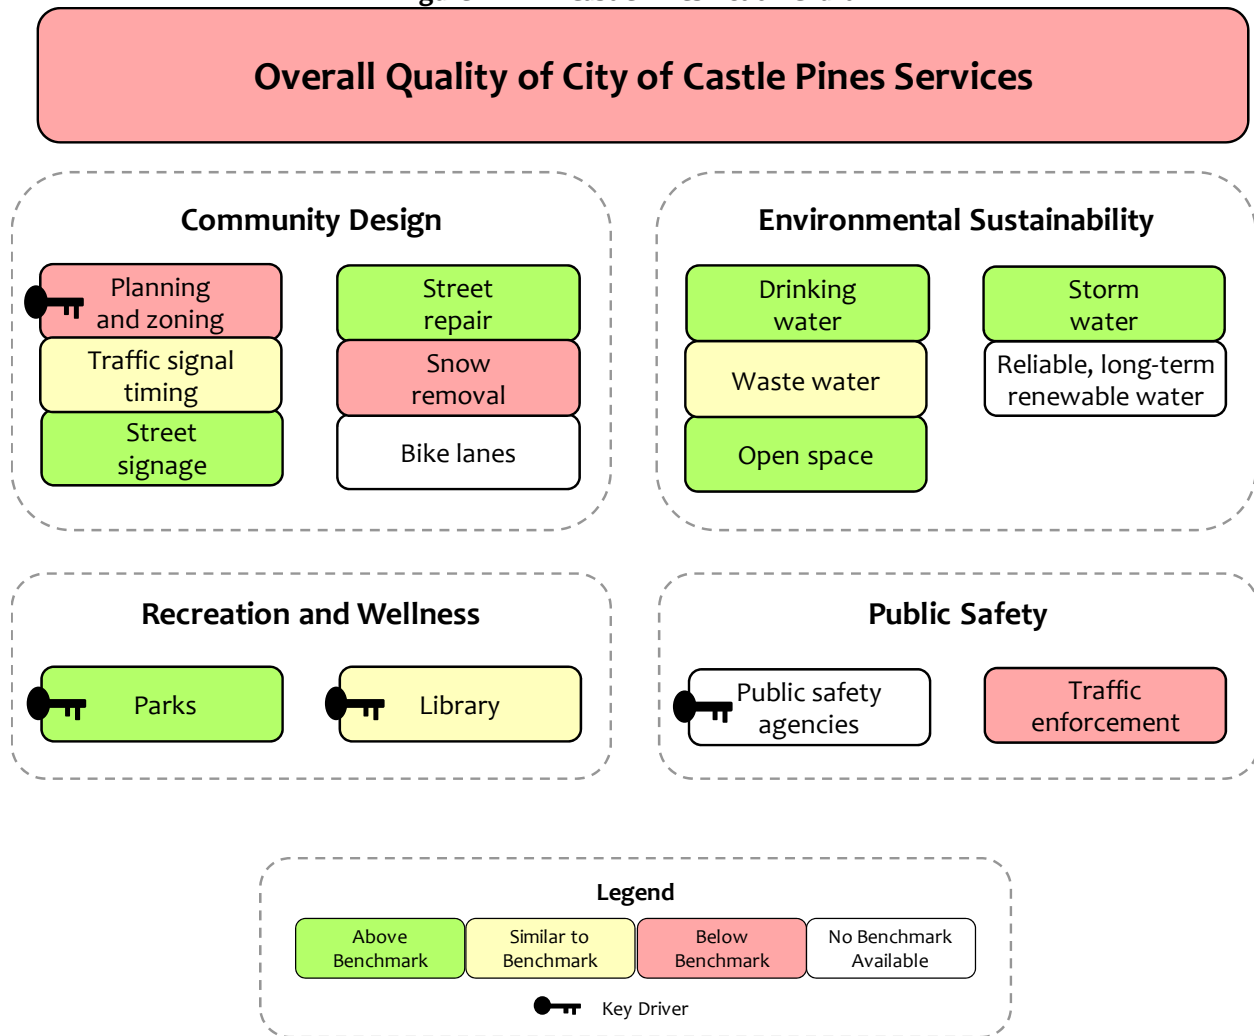

Fifteen services were included in the KDA for the City of Castle Pines. Four of these services were identified as key drivers for the City: land use planning and zoning, local library, public safety agencies' (i.e., fire and Sheriff) visibility in the community and parks. In Castle Pines, parks was rated higher than the national benchmark, the local library was similar to the benchmark and land use planning and zoning was below the benchmark. A benchmark comparison was not available for public safety agencies' visibility in the community.

Considering all performance data included in the Action Chart, a jurisdiction typically will want to consider improvements to any key driver services that are not at least similar to the benchmark. In Castle Pines, land use planning and zoning was below the benchmark. Therefore, this is a service that the City may want to focus on to improve ratings as ratings for this service could impact ratings given to the overall government performance. Since the local library was similar to the benchmark and no comparison was available for the visibility of public safety agencies, these are services on which the City may want to keep a watchful eye to potentially improve ratings of the overall quality of City services.

Services with a high percent of respondents answering “don’t know” (i.e., more than 40%) were excluded from the analysis and were considered services that would be less influential. See Appendix A: Complete Set of Survey Frequencies for the percent “don’t know” responses for each service.

Figure 16: 2012 Castle Pines Action Chart™

## CITY EMPLOYEES

Approximately one in three respondents reported having had contact with an office employee of the City of Castle Pines within the past year. This level of contact was much lower than both the national and Front Range benchmarks.

**Figure 17: Contact with City Office Employees**

Of those respondents who had contact with a City office employee, most rated their overall impression was either “excellent” or “good,” which was much below both benchmarks (see Figure 20 on page 24).

**Figure 18: Overall Impression of City Office Employees**

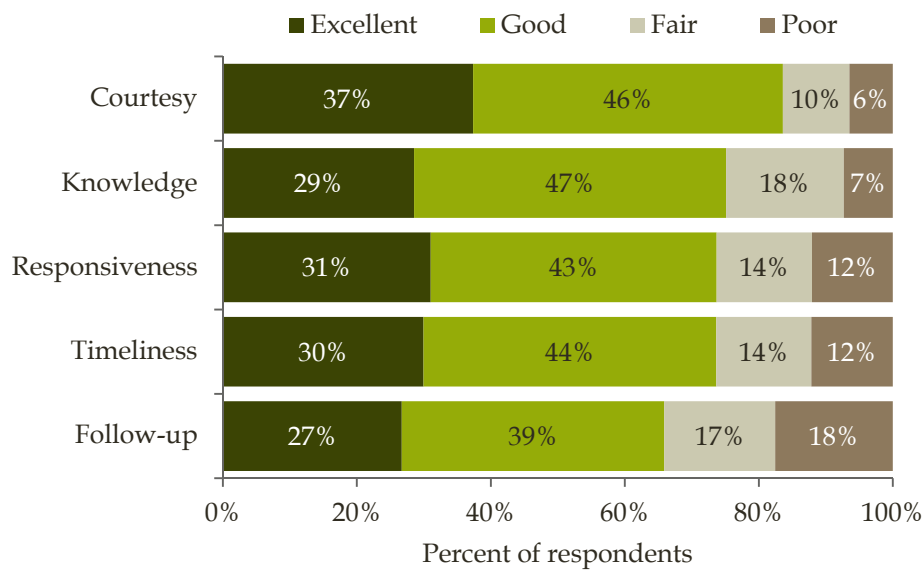

*Asked only of those who reported having contact with a City office employee in the 12 months prior to the survey.*

Respondents who had an interaction with an office employee of the City were asked to rate several characteristics of that employee. More than 6 in 10 respondents rated the employees’ courtesy, knowledge, responsiveness, timeliness and follow-up as “excellent” or “good.”

Castle Pines City employees’ timeliness and follow-up were similar to other communities across the nation but below or much below these communities in terms of courtesy, knowledge and responsiveness. These three characteristics also were much below other communities in the Front Range. Castle Pines City employees scored much above the Front Range benchmark in terms of follow-up.

When looking at ratings of employee characteristics by Ward, respondents from each Ward tended to evaluate City employees in a similar manner (see Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence).

**Figure 19: Perceptions of City Office Employee Characteristics**

**Figure 20: Perceptions of City Office Employee Characteristics Benchmarks**

What was your impression of the office employee(s) of the City of Castle Pines in your most recent contact?	National comparison	Front Range comparison

Knowledge	Much below	Much below
Responsiveness	Much below	Much below
Timeliness	Similar	NA
Follow-up	Similar	Much above

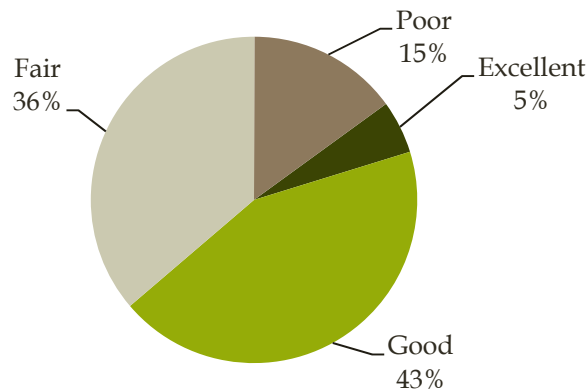

*Asked only of those who reported having contact with a City office employee in the 12 months prior to the survey.*

## GOVERNMENT PERFORMANCE

Survey respondents were asked to evaluate 11 aspects of local government performance. About half (49%) thought the overall direction was “excellent” or “good” while the remaining 51% thought the overall direction was either “fair” or “poor.” These ratings were much below both national and Front Range benchmarks.

Respondents who had lived in Castle Pines for ten years or more were less likely to think the overall direction the City was taking was “excellent” or “good” than were those who had lived in the city for a shorter period of time (see *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

**Figure 21: Overall Direction the City is Taking**

More than half of respondents rated the following four categories of Castle Pines government performance as either “excellent” or “good”:

- Parks and recreation
- Communicating with residents
- The quality of services provided by the City’s street repair contractors
- Opportunities to participate in City government decisions

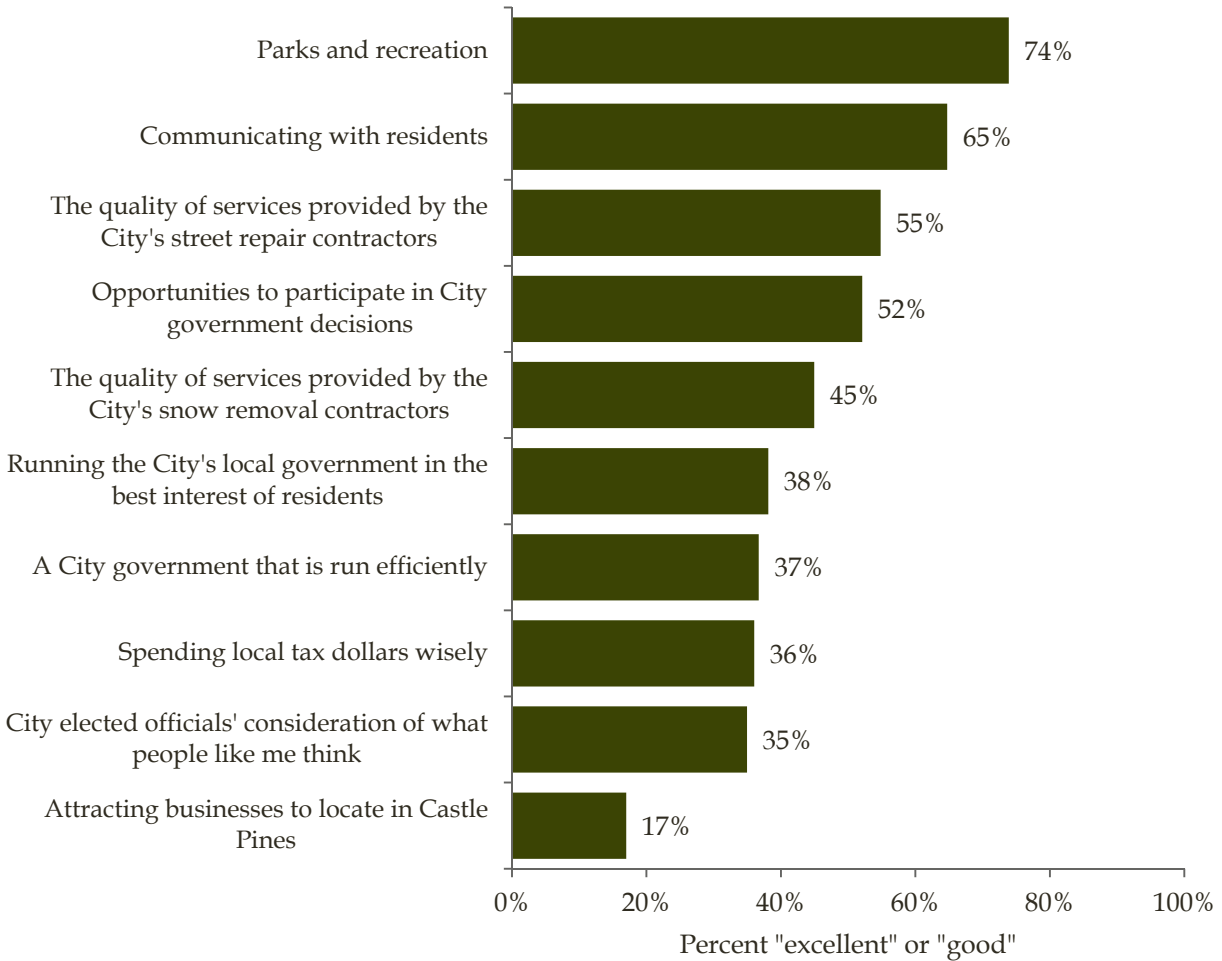

More than 20% of respondents selected “don’t know” when assessing government performance in 6 of the 10 remaining areas (see *Appendix A: Complete Set of Survey Frequencies* for a full set of responses including “don’t know”).

Of the six categories of government performance that could be compared to other communities across the nation, only one (communicating with residents) was rated above the benchmark. The other five categories were below the national benchmarks. Similarly, the three categories that could be compared to other Front Range communities were all rated lower Castle Pines.

Ratings of government performance were similar across Wards in most categories. Respondents from Ward 2, however, rated street repair contractors higher than respondents from other the Wards. Respondents without children under age 18 or with an older adult (age 55+) living in the household gave higher ratings to the City’s snow removal contractors than their counterparts. In addition, respondents who had lived in Castle Pines for five years or less tended to give higher ratings to several areas of government performance than did those residing in the city for a longer period of time (See *Appendix C: Comparison of Select Questions by Respondent Characteristics*). Respondents who had lived in Castle Pines for five years or less generally tended to give more

positive ratings to government performance compared to those who had lived in Castle Pines for more than five years.

**Figure 22: Castle Pines City Government Performance**

## SOURCES OF INFORMATION ABOUT CASTLE PINES

The *Castle Pines Connection* newspaper was the most commonly used source of information on Castle Pines for survey respondents. Other popular sources of information about Castle Pines were word of mouth and the City’s quarterly newsletter (*The Castle Pines Citizen*). Unlike these commonly used sources of information, the following seven sources were never used by a majority of survey respondents:

- Castle Pines Chamber of Commerce emails
- City Council meeting minutes online
- Social networking sites (i.e., Facebook, MySpace, Twitter, etc.)
- Castle Pines Chamber of Commerce Web site ([www.castlepineschamber.com](http://www.castlepineschamber.com))
- City Council meetings (in-person)
- Master Association Board meetings
- Metro District Board meetings

The *Douglas County News Press* newspaper was most popular among respondents from Ward 3. On the other hand, the Castle Pines Chamber of Commerce Web site was least popular among respondents from Ward 2 (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 24: Sources of Information about Castle Pines**

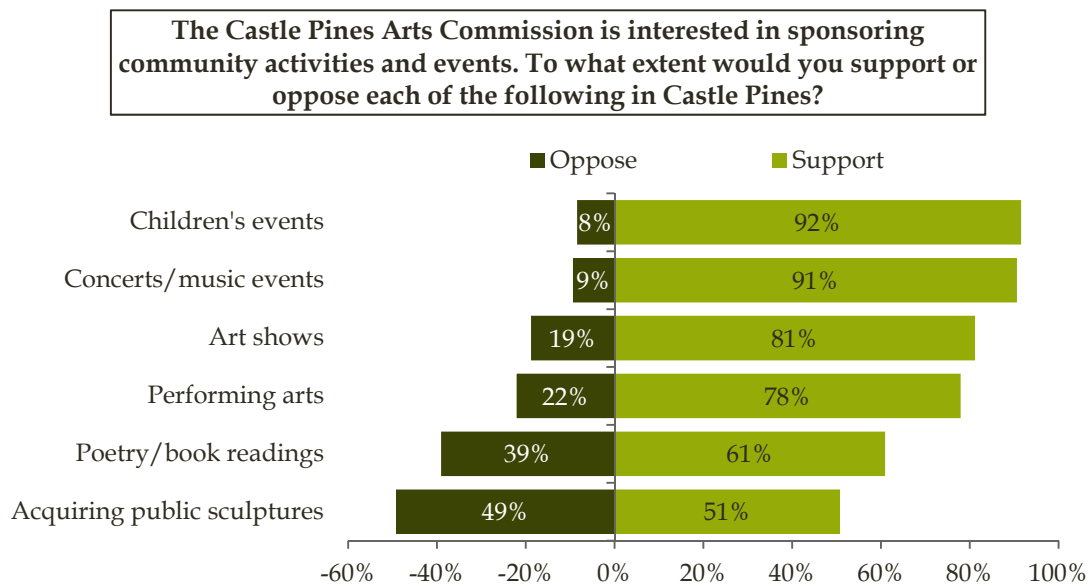

How frequently, if ever, do you use the following sources to gain information about Castle Pines?	Always	Frequently	Sometimes	Never
<i>Castle Pines Connection</i> newspaper	40%	36%	19%	5%
Word of mouth	8%	40%	46%	6%
The City’s quarterly newsletter ( <i>The Castle Pines Citizen</i> )	19%	36%	34%	11%
The City’s Web site ( <a href="http://www.castlepinesgov.com">www.castlepinesgov.com</a> )	4%	21%	60%	16%
City emails	11%	33%	38%	19%
Master Association emails	11%	29%	40%	20%

Castle Pines Chamber of Commerce Web site ( <a href="http://www.castlepineschamber.com">www.castlepineschamber.com</a> )	1%	5%	26%	69%
City Council meetings (in-person)	0%	3%	21%	76%
Master Association Board meetings	1%	3%	18%	78%
Metro District Board meetings	0%	3%	18%	79%

## COMMUNITY ACTIVITIES AND EVENTS

Survey respondents were provided with a list of six potential community activities and events that the Castle Pines Arts Commission was interested in sponsoring. A majority of respondents supported five of the community activities and events. Children’s events and concerts/music were almost universally supported with about 9 in 10 supporting each (and half of respondents “strongly” supported these two activities; see *Appendix A: Complete Set of Survey Frequencies*). Art shows and performing arts were supported by most respondents (about three-quarters or more), and poetry/book readings were supported by about 6 in 10 respondents. Respondents were equally split on the acquisition of public sculptures; however, more than twice as many “strongly” opposed this activity as “strongly” supported it.

Levels of support for each activity and event generally were the same across all Wards in Castle Pines. Poetry/book readings, however, were slightly more popular among respondents from Ward 3 (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

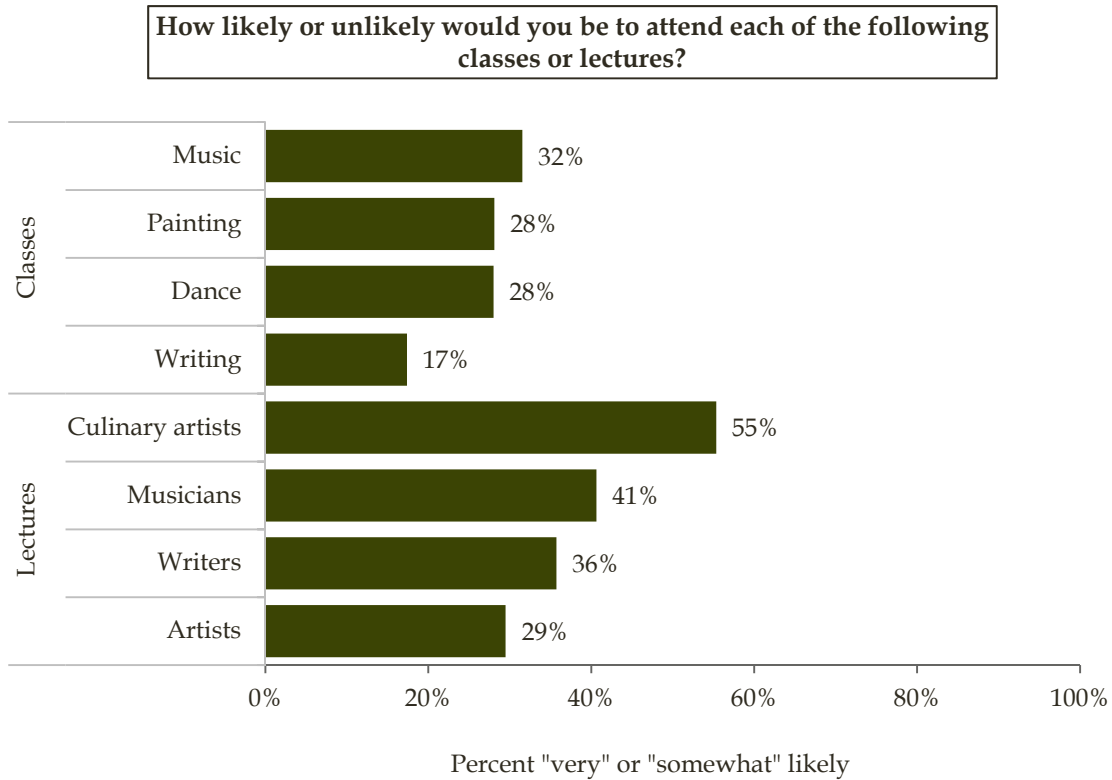

**Figure 25: Castle Pines Arts Commission Community Activities and Events**

Respondents also were asked how likely they would be to attend a variety of classes or lectures. In general, lectures generated more interest than classes among respondents and most respondents said they would not be likely to attend seven of the eight topic areas listed. Only lectures by culinary artists managed to generate interest from a slight majority of respondents (55% were “very” or “somewhat” likely to attend).

While there was less interest in music classes among Ward 2 respondents, in general, interest in the other classes and lectures was similar across Wards in Castle Pines (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 26: Likelihood of Attending Classes and Lectures**

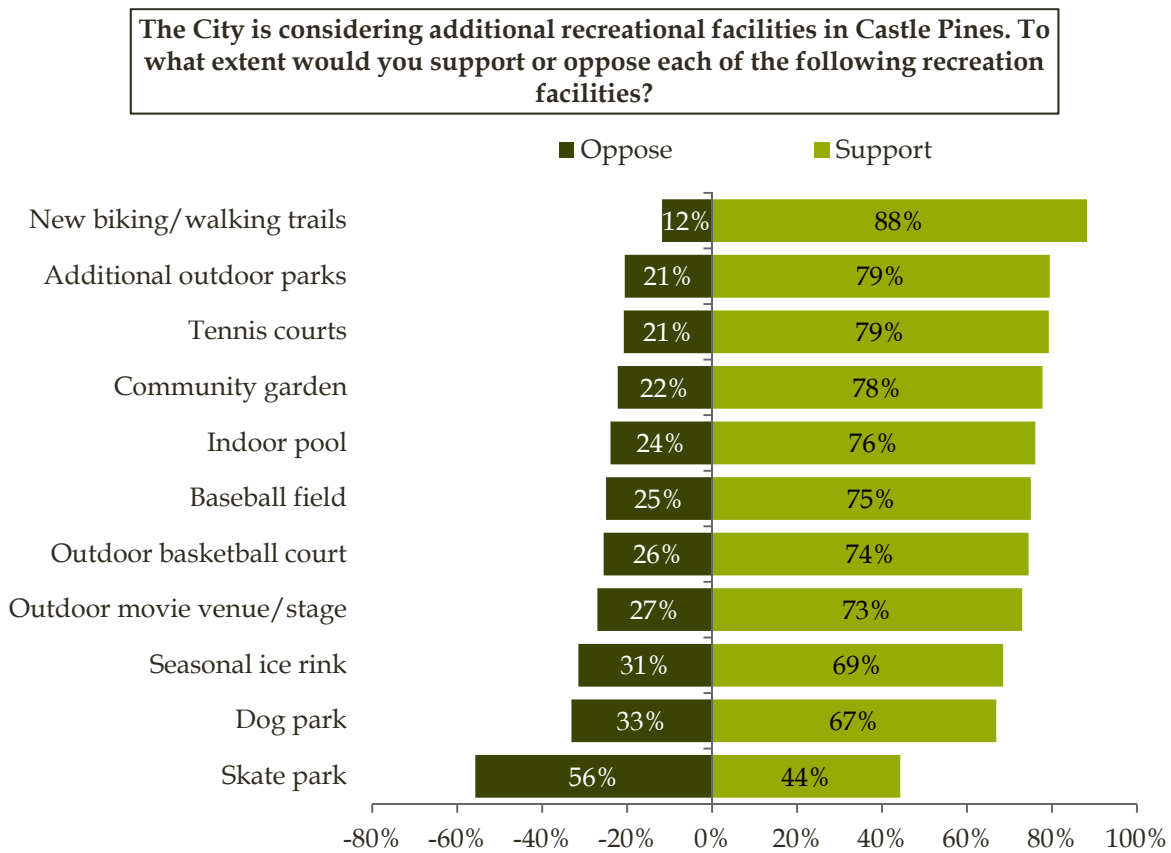

## CASTLE PINES RECREATION FACILITIES AND AMENITIES

The survey described that the City was considering 11 additional recreational facilities in Castle Pines and respondents were asked if they would support or oppose each. A majority of respondents supported 10 of the 11 proposed recreational facilities.

New biking/walking trails was the most popular option on this list. Only a skate park generated opposition from a majority of respondents (56% opposed) in a clear departure from the other facilities listed.

Respondents from Ward 1 tended to be more supportive of most of the proposed recreational facilities than were those in the other two Wards. Respondents from Ward 3 were more likely to support a community garden than were those living in the other Wards (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence* for more detail). No differences were seen across demographic subgroups.

**Figure 27: Additional Recreational Facilities**

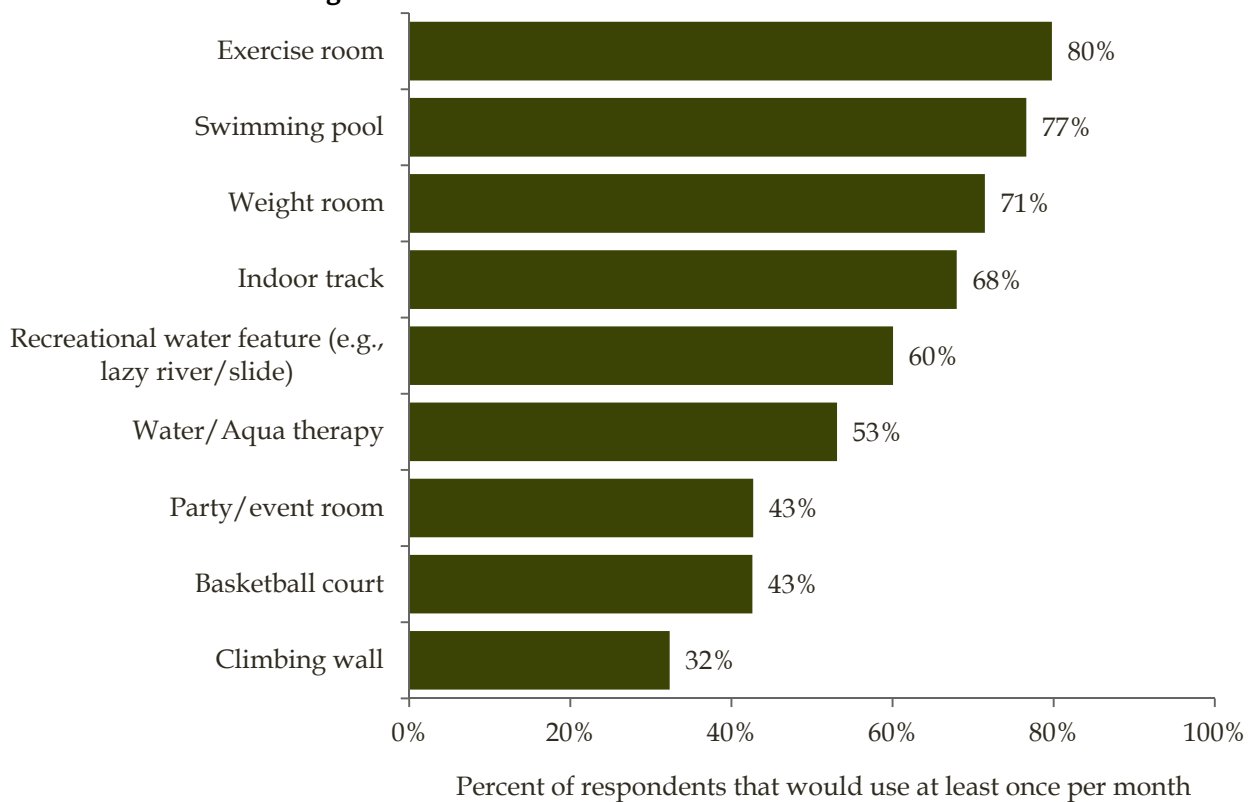

Since Castle Pines does not currently have a recreation center but could in the future, respondents were asked how often during a typical month they would use nine different amenities at a hypothetical recreation center. Respondents indicated that an exercise room and swimming pool would get the most use, with about 8 in 10 respondents indicating that they would use these two amenities at least once a month. About half of respondents (54%) indicated they would use an exercise room at least a few times a week (see *Appendix A: Complete Set of Survey Frequencies*).

Less than half of respondents indicated that they would use a party/event room or a basketball court at all in a typical month, while two-thirds said they would never use a climbing wall.

Respondents from Ward 1 were more likely to indicate that they would use most of the potential amenities of a recreation center at least once in a typical month than those living in Wards 2 or 3 (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 28: Use of Planned Recreation Center Amenities**

In addition to rating their likely use of various recreation center amenities, survey recipients were asked to indicate their support for or opposition to a possible recreation center in Castle Pines. A large majority of respondents supported a recreation center, with 61% saying they “strongly” supported such a facility and 23% “somewhat” supporting it. This finding echoes the common write-in response for desired stores/services in Castle Pines.

Support was stronger among respondents living in Ward 1, female respondents, respondents in households with children 17 or under and among respondents who have lived in Castle Pines for 10 years or less than among their counterparts (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence* and *Appendix C: Comparison of Select Questions by Respondent Characteristics*).

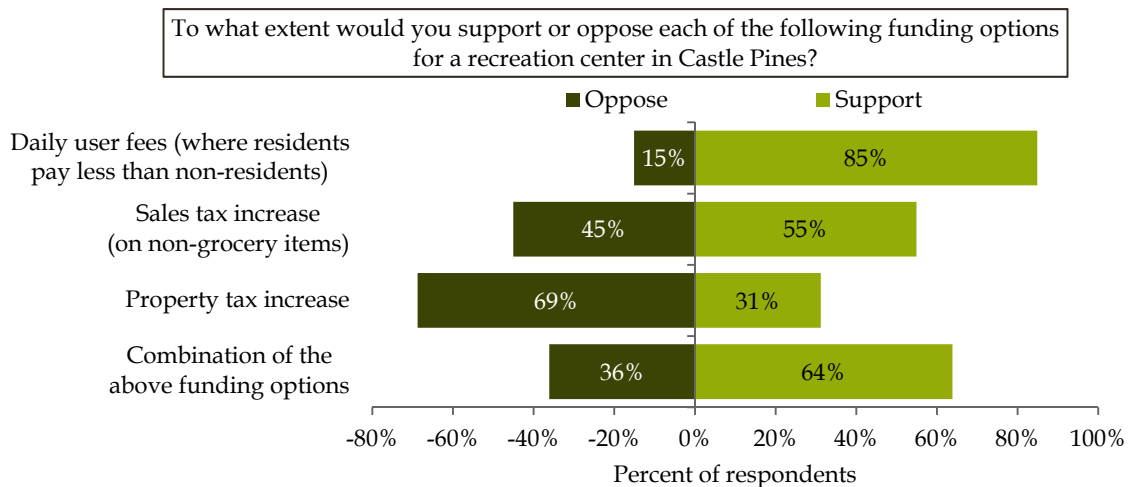

**Figure 29: Recreation Center in Castle Pines**

Respondents were then asked to rate their support for or opposition to four funding options for a potential recreation center in Castle Pines. The most popular funding option was the use of daily user fees where Castle Pines residents would receive a discount (85% support, with 53% “strongly” support). A slight majority supported a sales tax on non-grocery items (55%), while a property tax increase was opposed by about two-thirds (69%) of respondents. Five times as many respondents “strongly” opposed a property tax increase as “strongly” supported it (see *Appendix A: Complete Set of Survey Frequencies* for a full set of responses to this question). A combination of these three options, however, was supported by almost two-thirds of respondents and received the second highest level of support after user fees.

Respondents living in Ward 1 were much more likely to support a sales tax increase or a combination of the various funding options to finance a recreation center in Castle Pines (see *Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence*).

**Figure 30: Funding Options for Recreation Center**

Of those who opposed the creation of a recreation center, 51% supported funding through daily user fees. Those who supported the creation of a recreation center were significantly more likely to support all of the possible funding options, though a minority still gave only limited support to a property tax increase.

**Figure 31: Funding Options by Support for a Recreation Center in Castle Pines**

To what extent would you support or oppose each of the following funding options for a recreation center in Castle Pines?	“Somewhat” or “strongly” oppose recreation center	“Somewhat” or “strongly” support recreation center	Overall support
Daily user fees (where residents pay less than non-residents)	51%	92%	85%
Sales tax increase (on non-grocery items)	2%	66%	55%
Property tax increase	1%	38%	31%
Combination of the above funding options	5%	76%	64%
Overall	17%	84%	--

## PRIVATE TRASH AND RECYCLING

When asked the extent to which they would support or oppose the City contracting with a private company for a community trash and recycling program for a monthly fee, respondents were split evenly on this issue. A slight majority (56%) of respondents indicated they would support such an initiative, but more respondents strongly opposed than strongly supported it.

**Figure 32: Private Trash and Recycling Program**

## CHALLENGES AND PRIORITIES

Respondents were asked to think about the challenges facing Castle Pines residents over the next few years. They were first asked rate how important each challenge was for the community to address and then to select the two they felt were the most vital (see Figure 33). Respondents believed that securing reliable, long-term renewable water was the most important challenge for the Castle Pines community to address, with almost two-thirds of respondents indicating that it was “essential” for Castle Pines to address. Furthermore, a majority of respondents indicated that this was one of the most “vital” challenges facing Castle Pines.

About 9 in 10 respondents also indicated that it was “essential” or “very important” for Castle Pines to address road and street maintenance and 84% said the same of managing growth and development. Reducing taxes (59%) and providing additional recreational opportunities (51%) received the next highest priority ratings.

Addressing traffic problems and reducing user fees appeared to lesser concerns for respondents; less than 10% of respondents indicated that these were “vital” challenges facing Castle Pines.

While the importance of maintaining roads and streets and securing reliable, long-term renewable water was consistently high across all Wards, ratings of several of the other items varied by Ward. Managing growth and development and addressing traffic problems were more important for respondents in Wards 2 and 3. Reducing taxes and encouraging a viable business district were more important for respondents in Wards 1 and 2 (see Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence).

Generally, older adults (age 55+) were more likely to believe that these challenges were important than were younger adults (see Appendix C: Comparison of Select Questions by Respondent Characteristics). Respondents who had lived in the city for more than 10 years tended to feel that reducing taxes and encouraging a viable business district were less important challenges than did those who had lived in the city for a shorter period of time.

**Figure 33: Challenges Facing Castle Pines**

Thinking about the challenges facing Castle Pines residents over the next few years, first, please tell us how important, if at all, it is to you that our community addresses each of the following. Then, in the last column, please indicate which TWO (2) are the most vital to you.	Essential	Very important	Somewhat important	Not at all important	Total	Most vital challenges facing Castle Pines*
Securing reliable, long-term renewable water	62%	29%	8%	1%	100%	57%
Maintaining roads and streets	48%	44%	8%	0%	100%	34%
Managing growth and development	41%	43%	15%	2%	100%	27%
Reducing taxes	29%	30%	32%	10%	100%	26%
Providing additional recreational opportunities	23%	28%	32%	16%	100%	24%
Encouraging a viable business district	26%	38%	26%	10%	100%	22%
Addressing traffic problems	22%	40%	32%	6%	100%	7%
Reducing user fees	17%	27%	39%	16%	100%	3%

\* Column does not total to 100%. Respondents could select up to two challenges as most vital.

A similar question on the survey asked respondents to think about the existing Metro District priorities, to rate the importance of each and then select the three most vital. Securing reliable, long-term renewable water also was the top Metro District priority for respondents. More than two-thirds of respondents indicated that this was the most “essential” priority, and about 9 in 10 thought this was one of the most “vital” priorities for the Metro District. Reducing water, wastewater, and storm water utility costs was the only other priority that half of respondents indicated was most “vital.”

Additionally, a majority of respondents also indicated that the following priorities were either “essential” or “very important.”

- Weaning the community’s reliance on the Denver Basin Aquifer System (64%)
- Continuing to pre-pay the existing \$15.06 million in 1990s-era ‘legacy debt’ (58%)

Approximately one in five respondents indicated that expanding the household appliance water conservation rebate program and expanding the outdoor irrigation water conservation rebate program were “vital” Metro District priorities.

While respondents from each Ward rated the top two priorities similarly highly, the remaining five priorities saw differences among respondents from each Ward. Weaning the community’s reliance on the Denver Basin Aquifer System was more important for respondents in Wards 2 and 3 than in Ward 1. Implementing more aggressive water-conservation strategies, continuing to pre-pay the existing \$15.06 million in 1990s-era “legacy debt,” expanding the outdoor irrigation water conservation rebate program and expanding the household appliance water conservation rebate program were rated less important in Ward 1 and more important among respondents from Ward 3 (see Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence).

**Figure 34: Metro District Priorities**

Thinking about the existing Metro District priorities, first, please rate each of the following. Then, in the last column, please indicate which THREE (3) are the most vital to you.	Essential	Very important	Somewhat important	Not at all important	Total	Most vital Metro District priorities*
Securing reliable, long-term renewable water	68%	24%	7%	1%	100%	89%
Reducing water, wastewater, and storm water utility costs	25%	43%	29%	3%	100%	51%
Weaning the community’s reliance on the Denver Basin Aquifer System	22%	40%	33%	5%	100%	37%
Continuing to pre-pay the existing \$15.06 million in 1990s-era ‘legacy debt’	23%	35%	32%	10%	100%	31%
Implementing more aggressive water-conservation strategies	20%	35%	36%	9%	100%	29%
Expanding the household appliance water conservation rebate program	11%	32%	43%	14%	100%	19%
Expanding the outdoor irrigation water conservation rebate program	12%	33%	43%	12%	100%	18%

\* Column does not total to 100%. Respondents could select up to three priorities as the most vital.

## Appendix A: Complete Set of Survey Frequencies

### RESPONSES EXCLUDING “DON’T KNOW”

The following pages contain a complete set of responses to each question on the survey, excluding the “don’t know” responses.

Question 1					
Please rate each of the following aspects of quality of life in Castle Pines.	Excellent	Good	Fair	Poor	Total
Castle Pines as a place to live	53%	42%	4%	0%	100%
Your neighborhood as a place to live	53%	41%	5%	1%	100%
Castle Pines as a place to raise children	56%	38%	5%	1%	100%
Castle Pines as a place to retire	31%	39%	23%	7%	100%
Castle Pines as a place to work	15%	26%	30%	29%	100%
The overall quality of life in Castle Pines	46%	49%	5%	1%	100%

Question 2					
Please rate the following characteristics as they relate to Castle Pines as a whole.	Excellent	Good	Fair	Poor	Total
Sense of community	18%	52%	25%	6%	100%
Overall appearance of Castle Pines	27%	59%	13%	2%	100%
Overall quality of business and service establishments in Castle Pines	8%	48%	36%	9%	100%
Recreational opportunities	10%	39%	36%	15%	100%
Opportunities to attend family-oriented events/activities	13%	53%	29%	5%	100%
Opportunities to attend cultural activities	3%	16%	41%	40%	100%
Opportunities for older adult activities	3%	14%	46%	36%	100%

**Question 20: Private Trash Hauling Compared by Ward**

To what extent would you support or oppose the City contracting a private company for a community trash and recycling program for a monthly fee?	Ward			Overall
	Ward 1	Ward 2	Ward 3	
To what extent would you support or oppose the City contracting a private company for a community trash and recycling program for a monthly fee?	57%	59%	49%	56%

Values represent the percentage of respondents who “strongly” or “somewhat” support.

**Question 21: Challenges Facing Castle Pines Compared by Ward**

Thinking about the challenges facing Castle Pines residents over the next few years, first, please tell us how important, if at all, it is to you that our community addresses each of the following.	Ward			Overall
	Ward 1	Ward 2	Ward 3	
Maintaining roads and streets	91%	94%	91%	92%
Securing reliable, long-term renewable water	90%	92%	93%	92%
Managing growth and development	78%	86%	87%	84%
Addressing traffic problems	55%	64%	65%	62%
Providing additional recreational opportunities	60%	47%	49%	52%
Reducing taxes	60%	62%	52%	58%
Reducing user fees	46%	46%	39%	44%
Encouraging a viable business district	68%	65%	57%	64%

Values represent the percentage of respondents who indicated “essential” or “very important” for each item.

**Question 21: Vital Challenges Compared by Ward**

Please indicate which <b>two</b> challenges facing Castle Pines are the most vital to you.	Ward 1	Ward 2	Ward 3	Overall
Maintaining roads and streets	40%	32%	29%	34%
Securing reliable, long-term renewable water	50%	58%	63%	57%
Managing growth and development	24%	27%	31%	27%
Addressing traffic problems	3%	7%	11%	7%
Providing additional recreational opportunities	30%	20%	25%	24%
Reducing taxes	29%	30%	17%	26%
Reducing user fees	3%	3%	3%	3%
Encouraging a viable business district	22%	24%	21%	22%

Values represent the percentage of respondents who selected each item. Respondents were allowed to select up to two responses.

**Question 22: Metro District Priorities Compared by Ward**

Thinking about the existing Metro District priorities, first, please rate each of the following.	Ward			Overall
	Ward 1	Ward 2	Ward 3	
Securing reliable, long-term renewable water	91%	94%	94%	93%
Implementing more aggressive water-conservation strategies	48%	55%	60%	55%
Weaning the community’s reliance on the Denver Basin Aquifer System	54%	64%	66%	62%
Continuing to pre-pay the existing \$15.06 million in 1990s-era legacy debt	52%	58%	65%	58%
Expanding the outdoor irrigation water conservation rebate program	39%	46%	50%	45%
Expanding the household appliance water conservation rebate program	37%	43%	49%	43%
Reducing water, wastewater, and storm water utility costs	69%	68%	68%	68%

Values represent the percentage of respondents who indicated “essential” or “very important” for each item.

<b>Question 22: Three Most Vital Priorities Compared by Ward</b>				
<b>Please indicate which three Metro District priorities are the most vital to you.</b>	<b>Ward 1</b>	<b>Ward 2</b>	<b>Ward 3</b>	<b>Overall</b>
Securing reliable, long-term renewable water	89%	91%	88%	89%
Implementing more aggressive water-conservation strategies	29%	29%	32%	30%
Weaning the community's reliance on the Denver Basin Aquifer System	34%	36%	40%	37%
Continuing to pre-pay the existing \$15.06 million in 1990s-era "legacy debt"	27%	32%	34%	31%
Expanding the outdoor irrigation water conservation rebate program	15%	18%	19%	17%
Expanding the household appliance water conservation rebate program	19%	18%	19%	19%
Reducing water, wastewater, and storm water utility costs	61%	50%	45%	52%

*Values represent the percentage of respondents who selected each item. Respondents were allowed to select up to three responses.*

## Appendix C: Comparison of Select Questions by Respondent Characteristics

Ratings for select survey questions are compared by respondent demographic characteristics in this appendix. Cells shaded grey indicate statistically significant differences ( $p \leq .05$ ).

### Question 1 Compared by Children/Teenagers in Household and Older Adults in Household

Please rate each of the following aspects of quality of life in Castle Pines:	Households with children 17 or under			Households with adults 55 or older		
	No children	Have children 17 or younger	Overall	No older adults	1 or more older adults	Overall
Castle Pines as a place to live	94%	97%	96%	97%	94%	96%
Your neighborhood as a place to live	94%	93%	94%	93%	95%	94%
Castle Pines as a place to raise children	93%	95%	94%	95%	94%	94%
Castle Pines as a place to retire	74%	65%	70%	68%	72%	70%
Castle Pines as a place to work	45%	39%	41%	38%	48%	42%
The overall quality of life in Castle Pines	94%	95%	94%	94%	95%	94%

Values represent the percentage of respondents who indicated “excellent” or “good” for each item.

### Question 1 Compared by Gender and Respondent Length of Residency

Please rate each of the following aspects of quality of life in Castle Pines:	Gender			Respondent length of residency			
	Female	Male	Overall	5 years or less	6-10 years	More than 10 years	Overall
Castle Pines as a place to live	96%	95%	95%	99%	94%	95%	96%
Your neighborhood as a place to live	94%	94%	94%	97%	92%	94%	94%
Castle Pines as a place to raise children	96%	93%	94%	95%	96%	93%	95%
Castle Pines as a place to retire	75%	65%	70%	75%	70%	67%	70%
Castle Pines as a place to work	43%	41%	42%	44%	42%	41%	42%
The overall quality of life in Castle Pines	96%	92%	94%	98%	94%	93%	94%

Values represent the percentage of respondents who indicated “excellent” or “good” for each item.

**Question 2 Compared by Children/Teenagers in Household and Older Adults in Household**

Please rate the following characteristics as they relate to Castle Pines as a whole.	Households with Children 17 or under			Households with Adults 55 or Older

Reducing user fees	47%	42%	45%	39%	47%	44%	44%
Encouraging a viable business district	65%	63%	64%	67%	66%	59%	64%

Values represent the percentage of respondents who indicated “essential” or “very important.”

## RECREATION CENTER FUNDING OPTIONS AND AMENITIES COMPARED BY SUPPORT FOR OR OPPOSITION TO A RECREATION CENTER IN CASTLE PINES

<b>Question 19 (Funding Options) by Question 18 (Support for a Recreation center in Castle Pines)</b>			
<b>To what extent would you support or oppose each of the following funding options for a recreation center in Castle Pines?</b>	<b>To what extent would you support or oppose a recreation center in Castle Pines?</b>		
	<b>Oppose Rec Center</b>	<b>Support Rec Center</b>	<b>Overall</b>
Sales tax increase (on non-grocery items)	2%	66%	55%
Property tax increase	1%	38%	31%
Daily user fees (where residents pay less than non-residents)	51%	92%	85%
Combination of the above funding options	5%	76%	64%
Overall	17%	84%	--

Values represent the percentage of respondents who “somewhat” or “strongly” support.

<b>Question 16 by Question 18 (Support for a Recreation center in Castle Pines)</b>			
<b>To what extent would you support or oppose each of the following recreation facilities?</b>	<b>To what extent would you support or oppose a recreation center in Castle Pines?</b>		
	<b>Oppose Rec Center</b>	<b>Support Rec Center</b>	<b>Overall</b>
Additional outdoor parks	53%	84%	79%
New biking/walking trails	70%	92%	88%
Skate park	22%	49%	44%
Seasonal ice rink	30%	76%	68%
Outdoor basketball court	43%	81%	74%
Baseball field	46%	81%	75%
Tennis courts	46%	86%	79%
Indoor pool	19%	88%	76%
Community garden	61%	81%	78%
Outdoor movie venue/ stage	38%	80%	73%
Dog park	47%	71%	67%
Overall	17%	84%	--

Values represent the percentage of respondents who “somewhat” or “strongly” support.

## Appendix D: Verbatim Responses to Open-ended Questions

Following are verbatim responses to question 8. Because these responses were typed by survey participants, they are presented here in verbatim form, including any typographical, grammar or other mistakes. Responses are in alphabetical order.

### Question 8: Which, if any, of the following stores and services would you like to see in Castle Pines? (Responses to “Other, please specify”)

- 1st run Movie theater
- 1stBank
- a bar better than Dukes or whatever is in that lousy spot.
- affordable office space
- Albertsons Grocery
- Any of these would be great as long as they are local. I'm sick of only having big chain stores and restaurants to choose from!
- anything that can withstand the rent & lack of support from other chambers. does an anti business message work? look at vacancy rates around Safeway & KS. Is this community pro- business?
- Arts & Crafts store
- auto parts
- Auto Parts
- Auto parts sports
- Aveda Spa and Salon
- Bars with Dancing Music
- big box store
- Book store, upscale restaurant, co rec center w-pool
- bookstore
- Bookstore
- Bookstore/sandwich shoppe combo
- Brewery
- car wash
- Car wash
- Car Wash
- Car Wash / Detail
- Card and Gift Shop
- card shop
- clothing retail
- clothing stores
- Coffee Bar
- Costco
- Crafts- Canvas and Cocktails
- Dairy Queen
- Dairy Queen/FroYo
- Dedicated Library, Organic Food Market
- DIY car wash
- English tea shoppe
- expanded library
- fabric store
- Farmers Market like Sprouts
- Fewer nails, dry clnrs, banks
- flower shop
- full service car wash
- full size post office
- Furniture, Nursery, Target
- Gamestop or something to interest teens
- Garden store
- gift shop
- Gift shop, other restaurant
- gifts
- grease monkey
- hallmark card store
- Hallmark Gift Store
- Hallmark, Baskin Robbins or D.Q.
- High volume and high tax income for the city
- I feel we have sufficient services and do not need larger stores because Castle Rock is near by enough for additional purchases
- Ice cream
- Ice Cream
- ice cream-
- Ice cream or kid celebration restaurant

- by Timber Trail Elementary, Kumon by TTE, breakfast/lunch restaurant by TTE, a scrapbooking/craft store
- ice cream shop
- Ice Cream store
- ice cream/frozen yogurt/gelato
- ice cream/yogurt shop
- inexpensive home boutique
- ladies clothing
- larger library
- larger stores
- less redundancy of stores/services
- local farmers market
- Local made/grown
- Local transit - helps handicapped
- Lowes, and Target
- md
- Medical
- medical marijuana
- more hair salons
- movie theatre
- movie/game rental
- Natural Grocers
- Natural Grocers or Trader Joe's
- Natural Grocery Store
- neighborhood pub
- No Big Box retail
- No increase in commercial buildings. Use what we have!
- No more stores!!!@
- office supplies, tavern/bar
- Organic foods
- organic grocer
- Organic store
- Overnight and day "camp" for dogs and cats, like Camp Bow Wow or Tails Up
- Please don't bring in commercial. The reason we moved here was because Castle Pines was mainly residential. Keep Castle Pines Residential. Keep Castle Pines Commercial Free.
- Porno movie
- Professional Photography
- Public Transportation!!!
- Self Serve Auto Wash
- senior housing
- Shoe Repair
- Specialty Discounter-Trader Joes
- sports bar
- Sports bar
- Sports Bar
- Sports bar, town center
- sports bar
- Strip club, bar, restaurant
- tanning salon
- Target or similar store
- Target, that type
- theater
- Total
- Trader Joe's
- Tuesday morning
- Unique boutique community area with shops, pubs, clubs and cultural foods to set Castle Pines apart from all other similar Colorado communities. Such an area set with views of the front range could provide an economic opportunity for busines.
- Up Scale Car Wash/Detail Service
- Urgent Care, Nursing Home
- Vitamin Cottage, Sprouts, or Sunflower
- Wells Fargo
- wells fargo bank
- Wells Fargo bank
- Wells Fargo Bank
- Wells Fargo Bank Service
- Wells Fargo Bank!
- Wells Fargo bank, more restaurants
- whole foods
- Whole Foods
- Whole Foods Grocery
- Whole Foods grocery store
- Whole Foods Market
- Whole Foods type grocery
- Whole Foods, Vitamin Cottage
- Whole Foods/fine dining
- yoga/pilates
- yogurt/crepes

## Appendix E: Detailed Survey Methodology

---

### SURVEY INSTRUMENT DEVELOPMENT

General citizen surveys, such as this one, ask recipients for their perspectives about the quality of life in the city, their use of City amenities, their opinion on policy issues facing the City and their assessment of City service delivery. The citizen survey instrument for Castle Pines started with a list of questions and topics developed by a Communications Team established by the City, which included two City Council members, the Mayor, two residents and the City Manager. Through an iterative process with NRC staff and the Communications Team, questions were refined and new questions were created. Finally, all questions were prioritized and an optimal composition of topics and questions were selected. Through this process between City staff and NRC staff, a final six-page print-equivalent questionnaire was created.

### SAMPLE SELECTION

“Sampling” refers to the method by which survey recipients are chosen. The “sample” refers to all those who were given a chance to participate in the survey. Any adult age 18 or older living in Castle Pines was eligible to complete the survey. Castle Pines promoted the survey as broadly as possible using multiple list sources, including a community mailing list and the City’s opt-in email list.

### SURVEY ADMINISTRATION AND RESPONSE RATE

The 2012 Castle Pines Citizen Survey was conducted online, though residents who preferred a printed copy could request one. An invitation letter was mailed by the City of Castle Pines to approximately 3,148 households at the beginning of April 2012. About one week later, an email invitation was sent by the City to everyone who subscribed to the City’s email distribution list (over 2,700 email addresses). A reminder email was sent to the same list of subscribers at the end of April. The City’s Master Homeowner’s Association also sent out an email reminder message to its members at the end of April asking residents to complete the Web survey. Additionally, the City publicized the survey in its *News and Notes* e-newsletter mid-April. Data collection ended the first week in May.

The survey instructions encouraged all adult residents 18 or older to complete the survey. Exceptionally few renters completed the survey (approximately 1%), and though renters are less likely than owners to respond to surveys, this very small rate of participation suggests that renters generally were not represented by the email and physical mailing lists. Because the sample was nearly entirely owners, the results are not generalizable to the perspective of all Castle Pines residents and instead, reflect the views of those who chose to participate.

The nature of the sampling and response patterns precludes the calculation of a precise response rate, though one can be approximated. Given that 1,406 respondents completed surveys (four of which were completed on a printed survey), that there are 6,876 adults age 18 years and 86% of housing units are owned (both according to the 2010 Census), the response rate is 20-23%.

### Confidence Intervals

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents’ opinions are relied on to estimate all residents’ opinions. A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the “true” population response.

This theory is applied in practice to mean that the “true” perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents indicate that they think city parks are “excellent” or “good,” then a 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of error is called sampling error. The practical difficulties of conducting any resident survey may introduce other sources of error in addition to sampling error. Despite best efforts to boost participation and ensure potential inclusion of all households, some selected households will decline participation in the survey (potentially introducing non-response error) and some eligible households may be unintentionally excluded from the sample (referred to as coverage error).

While Castle Pines’ survey respondents are not representative of the total adult population, this report uses the margin of error calculation to help the City identify when differences of opinion are more likely to be meaningful.

## DATA ANALYSIS

The surveys were analyzed using the Statistical Package for the Social Sciences (SPSS). Frequency distributions and the “percent positive” are presented in the body of the report and full results and results by subgroups are reported in the appendices (*Appendix B: Comparison of Select Questions by Respondent Geographic Area of Residence* and *Appendix C: Comparison of Select Questions by Respondent Characteristics*). Chi-square and ANOVA tests of significance were applied to breakdowns of selected survey questions by subgroups. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. Where differences between subgroups are statistically significant, they are marked with grey shading in tables.

# Appendix F: Jurisdictions Included in Benchmark Comparisons

Listed below are the jurisdictions included in the National benchmark comparisons provided for the City of Castle Pines followed by the 2010 population according to the U.S. Census. At the end of this section are listed the jurisdictions included in the Front Range benchmark comparisons.

## Jurisdictions Included in National Comparisons

Abilene, KS .....	6,844	Boulder County, CO .....	294,567
Airway Heights, WA .....	6,114	Boulder, CO.....	97,385
Alamogordo, NM .....	30,403	Bowling Green, KY .....	58,067
